

The "kanji" table/entity is based on the freely downloadable joyo kanji list from wikipedia.

Columns in the original data include:

- Kanji # (not sure what this sequence number is based on)
- New glyph (modern version of glyph)
- Old glyph
- # of Strokes (for the new glyph, I think)
- Grade level (1 - 6. S = Secondary, after elementary school.)
- English meaning
- On readings
- Kun readings
